

YMCA of Alaska

Artificial Intelligence (AI) Use Notice

At the YMCA of Alaska, our mission is built on people helping people. While we may use artificial intelligence (AI) tools to improve efficiency and communication, we believe technology should support, not replace, the relationships at the heart of our work.

How We Use AI

AI may be used to assist our staff with tasks such as:

- Drafting communications
- Brainstorming ideas
- Creating marketing materials
- Summarizing information
- Improving administrative efficiency

All content is reviewed by YMCA staff before it is published or shared.

Your Privacy Comes First

The YMCA of Alaska **does not use artificial intelligence to process or make decisions regarding your membership, personal information, financial information, or program eligibility.**

We do **not** upload member records, payment information, health information, or other confidential personal data into public AI tools.

Member information continues to be managed through our secure membership and business systems in accordance with our Privacy Policy and applicable laws.

Human Decisions Matter

Important decisions affecting members—including memberships, financial assistance, employment, childcare enrollment, and program participation—are made by YMCA staff, not by AI.

Technology may assist our work, but people remain responsible for every decision.

Responsible Use

When using AI tools, the YMCA of Alaska is committed to:

- Protecting member privacy and confidential information
- Maintaining human oversight and accountability
- Reviewing AI-generated content for accuracy

FOR YOUTH DEVELOPMENT®
FOR HEALTHY LIVING
FOR SOCIAL RESPONSIBILITY

-
- Using AI in ways that align with YMCA values of Caring, Honesty, Respect, and Responsibility
 - Continuously evaluating emerging technology to ensure it benefits our members and communities

Questions?

If you have questions about how the YMCA of Alaska uses artificial intelligence or how we protect your information, please contact us at:
